Work Experience

Codetown Technologies (Remote) | November 25 - Present

- Managed 1 dual-flow apps, ensuring clear separation of features and smooth, reliable user experience.
- Upgraded 5+ apps to higher Android API levels, and fixed legacy library issues to boost performance and stability.
- Built a real-time public transit navigation app with live bus tracking, route planning, and map-based stop visualization using React Native.
- Developed POS printing functionality with Thermal Printer SDK, enabling invoice and receipt printing.

Unikwork LLP. (May 2024 - November 2025)

- Developing feature-rich React Native applications with a focus on performance, scalability, and clean architecture.
- Implementing real-time data handling, push notifications, and secure authentication using Firebase and Supabase.
- Integrated REST APIs, Firebase services (Authentication, Firestore, Analytics, Remote Config, Push Notifications), and Stripe payment gateway.

Vacuity Pvt Ltd | (November 2022 - April 2024)

- Built and optimized cross-platform mobile applications using React Native, improving performance by ~30% with Redux Toolkit.
- Integrated Firebase (Auth, Firestore, Analytics, Push Notifications), Stripe payments, and deep linking.
- Released and maintained production apps via Google Play Console & App Store Connect, with API testing using Postman

Web designer at Tenacious Techies | (Dec 2021 - July 2022)

- Initiated professional career as a Web Designer, mastering foundational frontend technologies including HTML5, CSS3, and JavaScript.

Projects

Live 101 (Artiest Booking Project)

- Project is based on an artists and singers' booking system. Implement real-time chat functionality with typing indicators and message read receipts, providing a seamless communication experience.

Formly (Create google forms)

- Developed a high-performance React Native form builder with real-time Google Forms API integration for seamless CRUD operations and instant previews,
- Integrated RevenueCat for managed premium subscription templates.
- Enhanced UX with Firebase Push Notifications, Deep Linking for cross-platform sharing, and CSV/Excel data export functionality.

Bill swipe (Voting U.S. government amendment and assembly bills)

- Engineered an interactive React Native civic engagement app featuring a high-performance, gesture-driven Tinder-style swipe interface for bill voting.

Skills

- Mobile Development:** React Native CLI, Expo, Android Studio, Xcode
- Languages:** JavaScript, TypeScript
- Backend s Databases:** Firebase, Supabase, REST API Integration
- State Management:** Redux Toolkit, Zustand
- Cloud & Storage:** DigitalOcean Spaces via AWS S3 SDK, Supabase PostgreSQL, MongoDB
- Monetization s Analytics:** Google Ads, Google ADX, Google AdMob, Firebase Analytics
- Tools s Version Control:** Git, Github Desktop, Bitbucket, Sourcetree
- Methodologies:** Agile

Education

B.E. | Mahavir swami college of Eng and tech - Surat, Gujarat
Apr-2019 | CGPA: 6.65

Personal Portfolio

[CoC Gems -Earn Gems Reward](#)

- Clash of clans game fans play games like spin, mining, quiz, slot play, daily offerings rewards, get coins in reward and coins convert with gems.
